

Thinking about a colonoscopy?

Would you like to be a part of an exciting research opportunity?

DID YOU KNOW THAT COLON CANCER RATES ARE INCREASING IN YOUNGER ADULTS?

COLON CANCER IS:

- THE 2ND LEADING CAUSE OF CANCER DEATH IN THE UNITED STATES.
- AFFECTING MEN AND WOMEN EQUALLY.
- PREVENTABLE AND CAN SAVE 9 OUT OF 10 LIVES WHEN FOUND EARLY.*

Are you:

- 45-55 years old?
- Struggling with your weight?
- Due for or have recently had a screening colonoscopy?
- Living with a child between 9 & 18 years old?
- Considering a healthier lifestyle?

What is colon cancer?

Colorectal, or colon cancer, occurs when cells begin to grow rapidly out of control. A screening colonoscopy can find these growths (**polyps**) and remove them either **before cancer occurs** or at an early stage in the disease.
